

HASSAN FAREED D

AI Solutions Analyst | Business Analyst / Product Owner

hassanfareed5522@gmail.com | linkedin.com/in/hassan-fareed-d | Chennai, India

PROFILE

Business Analyst and Product Owner with 3 years across data analysis, digital transformation delivery and AI product management. Directs requirements and roadmap for AI agent products in healthcare, supply chain and BFSI, and designs and builds end-to-end workflow automation across sales, presales, delivery, finance, talent and operations. Starts from the data, delivers in Agile increments, and keeps a person in the approval loop for every action that sends or changes data.

EXPERIENCE

Business Analyst (Acting as Product Owner) | elsai, Chennai Dec 2025 - Present

- Direct product requirements and roadmap for an AI agent platform across healthcare (prior authorisation and patient onboarding agents), supply chain and BFSI, working with AI developers from MVP through to production on the in-house governed agentic platform.
- Defined a tender evaluation solution of four autonomous agents (technical compliance, deviation classification, commercial normalisation, risk-weighted ranking) under a governance and audit layer.
- Work within governance-first constraints for regulated domains, including HIPAA-aligned data handling and human-in-the-loop review at material decision points.
- Author BRDs, FRDs and user stories with full requirement traceability, translating AI capabilities into clear requirements for business and technical stakeholders.
- Designed and built workflow automation suites for 7 business functions: sales, sales development, presales, delivery, finance, talent and operations, including a monthly 22-slide finance report generated from accounting data.
- Ran an AI enablement program that trained non-technical teams in project management, business analysis and shared services.
- Recognised with a company award for AI & Workflow Automation Impact.

Business Analyst | OptiSol Business Solutions, Chennai Oct 2024 - Nov 2025

- Delivered requirements engineering and end-to-end BRD/FRD documentation across 10+ client projects, including Kidney Beam (digital healthcare), EVFIN (EV financing), L&T ePragathi (construction) and Fanatic TV (entertainment).
- Translated requirements across healthcare, financial services and digital media into user stories, acceptance criteria and functional specifications.
- Coordinated UAT and stakeholder sign-off across concurrent projects with engineering, QA and business teams.

Data Analyst | Asian Building Materials Pvt Ltd Jun 2021 - May 2022

- Analysed sales data and built Power BI dashboards for stakeholder reporting, using Excel and Python for data cleaning, transformation and recurring sales reports.

PRODUCT

Rivox: AI learning app | Independent project Live on Google Play

- Designed and published an Android app with AI quizzes and learning paths, an in-app assistant grounded in the user's session history, voice interview practice with AI evaluation, and local-first storage.
